

1. Executive Summary (one page handout)

Category	Key Takeaways
Organisation & Purpose	EBA CLEARING provides euro payment infrastructure services, including high-value (EURO1), SEPA clearing, instant payments (RT1), fraud detection and prevention (FPAD, VOP), and 'Request to Pay' (R2P).
Recent Activities / Highlights	"Annual Report 2024" published 27 May 2025; Board elections 2025 results; FPAD VOP adoption across many countries; RT1 usage / volume exceeding earlier benchmarks.
Statistics (2024 & early 2025)	~23 billion transactions processed in 2024; new records: STEP2 SCT (66 million in one day, 2 April 2024), RT1 daily high (~6 million on 31 March 2025), STEP2 SDD Core (144 million on 1 April 2025).
Services Portfolio	• EURO1 – large-value payments • SEPA (STEP2-T, STEP2 SCT, STEP2 SDD) • RT1—instant payments / cross-border instants • Fraud prevention (FPAD) & Verification of Payee (VOP) • R2P, SEDA, etc.
Governance & Legal	Has shareholding structure, board, management; legal/disclaimer links; privacy & cookie notices; operates under European/regulatory frameworks.
Visual & Communication Aspects	Homepage features images, spotlight areas; structuring via menus; cookie consent dialog; link to download Annual Report PDF; "Read More" links.

2. Full Text Excerpts from Key Linked Pages

Below are some selected sections (full text excerpts) from:

- **EURO1 Overview** – (from "EURO1" → "Overview")
- **Annual Report 2024** – (from "Annual Report 2024" page)
- **Legal & Disclaimer** – legal notice / disclaimer text

Note: these are as seen currently; in the PDF I will include full page text of the pages that allow "Read More" (excerpts are from visible content and the "Read More" link prompts full page).

2.1 EURO1 – Overview

(Excerpt from the "EURO1 Overview" page)

"EURO1 is a high-value payment system for single euro payments. It provides settlement of large-value, time-critical payments in central bank money."

(If allowed, I'll capture more sections like "How does EURO1 work?", "Admission criteria", "Statistics" etc.)

2.2 Annual Report 2024

(Excerpt from "Annual Report 2024" page)

"Learn more about our services and activities in 2024. Download Report"

[The report includes full financials, performance metrics, breakdown by service line, governance statements, risk & compliance, ESG (environmental, social, governance) elements etc.]

(If accessible, I'll extract sections like "Key Financial Figures", "Operational Highlights", "Sustainability / ESG" etc.)

2.3 Legal & Disclaimer

(Excerpt from the "Legal and Disclaimer" link)

"All rights reserved by EBA CLEARING."

"We are using cookies to give you the best experience on our website."

"Cookie Notice, Privacy Overview, Strictly Necessary Cookies..."

Standard liability disclaimers, copyright, and legal responsibilities about content, usage, changes etc.

3. Screenshots / Visuals

- Screenshot of homepage "spotlight" section (image + title "Verification of Payee, RT1 OCT Inst, ESG, R2P ...").
 - Screen capture of the navigation menu (Services / Single Payments / EURO1, SEPA / STEP-2 etc.).
 - Footer area showing Legal & Disclaimer, Cookie Notice, social media links.
-

4. Full Detailed Site Contents

- Menus & navigation structure (all pages & subpages as listed).
- All "news & events" entries with date & short description.
- All statistics visible.
- The list of all services and their subitems.

EBA CLEARING — Website Summary & Details Source URL: <https://www.ebaclearing.eu/> Generated on: 2025-09-12 Site overview EBA CLEARING operates payment infrastructure and services across Europe focused on euro payments. The site presents an overview of the company, corporate governance, services (covering single payments, SEPA payments, instant payments, fraud-fighting solutions and other services), news and events, customer support and career information. Main navigation / sections About us (At a glance, The Company, Mission and Objectives, ESG, Reference Documents, History of EBA CLEARING), Corporate governance (The Shareholders, The Board, Board Committees, The Management, User Say Governance), Regulatory (Comments on Consultative Reports), Contact Us, Services (EURO1, STEP1, STEP2-T, STEP2 SCT, STEP2 SDD Core, STEP2 SDD B2B, RT1, RT1 SCT Inst, RT1 OCT Inst, FPAD, VOP, STEP2 CC, SEDA, R2P), News & Events (Latest News, Newsletter, Blog, Upcoming events), Media and Customer support (Helpdesk, Country representatives, Billing & payment info, Central system time schedule). Highlighted services & short descriptions EURO1 — high-value single euro payments service. STEP1 / STEP2 — SEPA clearing

services (including STEP2-T, STEP2 SCT, STEP2 SDD Core, STEP2 SDD B2B and related settlement/processing pages). RT1 — instant payment infrastructure including SCT Inst and OCT Inst cross-border functionality. FPAD — Fraud Pattern and Anomaly Detection platform. VOP — Verification of Payee solution leveraging FPAD to reduce authorised push payment fraud. R2P — Request to Pay (proof-of-concept, videos). SEDA, SEDA-related services and other specialised offerings are also listed on the site. Latest news highlights (as shown on homepage) EBA CLEARING Board elections 2025 — 27 May 2025: new Deputy Chairperson Niklas Lemberg elected; several board re-elections and appointments. Annual Report 2024 now available — 27 May 2025. Strong uptake of EBA CLEARING's FPAD VOP solution — 22 May 2025: 55+ RT1 and STEP2 participants across 14 countries. RT1 registers volume boost — 21 March 2025: new records for RT1 processing. Key stats shown on the site Total transactions processed in EBA CLEARING payment services in 2024: 23 billion. New volume record for STEP2 SCT transactions processed on 2 April 2024: 66 million. New record day for RT1 processing on 31 March 2025: 6 million transactions. New volume record for STEP2 SDD Core transactions processed on 1 April 2025: 144 million. My EBA CLEARING: The EBA CLEARING Customer Portal

[Log in now](#)

Via the EBA CLEARING Customer Portal, service users can access service documentation, contact the EBA CLEARING customer support and manage their contact data.

Please note that access to the customer portal is restricted to EBA CLEARING service users and shareholders.

Please contact our [webmaster](#) if you have trouble accessing the customer portal.

Additional information if you have problems logging in

The EBA CLEARING customer portal login page uses Microsoft Online URLs. It can happen that companies block these URLs and you therefore cannot log in to the customer portal.

If this is the case, please contact your internal IT department to whitelist the following URLs:

- <https://login.microsoftonline.com/ebacdmcustomerdirectory.onmicrosoft.com>
- [*ebaportal.eu](https://ebaportal.eu) (or alternatively www.ebaportal.eu)
- [Filemanager.ebaclearing.eu](https://filemanager.ebaclearing.eu)

Once these URLs are whitelisted by your IT department, they are considered as a safe destination by your company and you will be able to log in to the customer portal.

Customer Support Helpdesk

The Customer Support Helpdesk is the single point of contact for participants connected to/using EBA CLEARING payment service(s) for operations-related and all other enquiries. It is dedicated to delivering efficient support and timely responses to your questions.

Ask us

Online via our secured contact form

The [case management](#) is accessible within the customer portal for registered Contact List users only.

If you don't have access to the customer portal but your institution is an EBA CLEARING service user, please contact your EBA CLEARING Administrators or Business Contacts to grant you access.

Service days

Our regular service days are from Monday to Friday, except for the following closing days:

- 1 January (New Year's Day)
- Good Friday
- Easter Monday
- 1 May (Labour Day)
- 25 December (Christmas Day)

- 26 December (Christmas Holiday)

Central system time schedule - Pilot

Important

The pilot time schedules below are purely indicative. Times may be adjusted ad-hoc and for temporary reasons, i.e. specific requirements. It is recommended to check the latest events directly from the EURO1 IWS the most updated version of STEP2 and RT1 Service Documents available on the My EBACL Customer Portal.

Please note:

T2 UTEST will be operating according to the T2 PROD schedule on the following days:

- From Monday, 20 January - Friday, 7 February 2025
- From Monday, 3 March - Friday, 21 March 2025
- From Friday, 4 April - Friday, 25 April 2025
- From Friday, 9 May - Thursday, 22 May 2025

The EURO1 pilot system will, on these dates, be adapted to operate according to the EURO1 live timings.

The Company

Who we are

EBA CLEARING is a provider of pan-European payment infrastructure solutions. Founded in 1998, the Company is owned by 48 of the major banks operating in Europe and based on a country-neutral governance model. The payment systems of EBA CLEARING are pan-European by design and desire: they are developed in close co-operation with the Company's multinational user community and best-of-breed technology partners.

EBA CLEARING manages two Systemically Important Payment Systems, the large-value euro payment system EURO1 and STEP2, a pan-European payment infrastructure system for mass payments in euro, which provides full reach to all financial institutions across Europe processing credit transfers and direct debits in euro. This means that more than 4,800 financial institutions in all SEPA countries are currently reachable via STEP2.

With the support of 39 funding institutions from across SEPA and its technology partner Nexi, EBA CLEARING in 2017 implemented RT1, a pan-European real-time payment infrastructure platform for euro transactions. The system is open to any PSP adhering to the EPC's SCT Inst Scheme and handles instant payments in line with the scheme.

Where we come from

EBA CLEARING is a bank-owned provider of pan-European payment infrastructure solutions and was founded in June 1998 by 52 banks.

EBA CLEARING set one of the first milestones of euro clearing in 1999, when the newly created company started operating EURO1, which the [Euro Banking Association \(EBA\)](#) had transferred to EBA CLEARING for the launch of the system. Today, EURO1 is the only private sector large-value payment system for single same-day euro transactions at a pan-European level. The EURO1 system processes transactions of high priority and urgency, and primarily of large amount, both at a domestic and at a cross-border level.

Since April 2003, EBA CLEARING has been managing and operating the STEP2 system, a Pan-European Automated Clearing House for mass payments in euro, which has been offering SEPA Services since January 2008. Today, the STEP2 system extends SEPA-wide reach to over 4,800 financial institutions through its SEPA services and is one of the key euro mass payment systems in Europe. A dedicated STEP2 service for the clearing of card-initiated transactions was launched in April 2015.

In March 2013, EBA CLEARING launched MyBank, an e-authorisation solution for online payments and other online transactions, which is geared at facilitating the growth of e-commerce across Europe. MyBank enables customers to pay for online purchases all across Europe by using their familiar online banking interface. Today, MyBank is owned and managed by [PRETA S.A.S.](#), a wholly owned subsidiary of EBA CLEARING.

In November 2017, EBA CLEARING launched RT1, an infrastructure solution for the processing of instant SEPA credit transfers at a pan-European level. The payment system operates around the clock on any day of the year. It supports payment service providers in transferring euro transactions between payment accounts in less than 10 seconds end to end, with immediate availability of the payment amount to the beneficiary.

Financial institutions from all over Europe can use RT1 for any payment product in euro that is fully compliant with the SCT Inst Scheme of the European Payments Council (EPC) and is in line with the ISO 20022 global messaging standards for real-time payments.

Commitment to information security: ISO 27001 certification and ongoing excellence

Since earning ISO 27001 certification in 2013, EBA CLEARING has demonstrated an unwavering commitment to information security.

This certification not only validates our implementation of robust security measures it also reinforces our dedication to compliance with international standards and ongoing improvements in our security practices.

We have meticulously built and managed thorough security programs, conducted regular risk assessments, and cultivated a strong culture of security awareness across the organisation.

Our mission is to safeguard all information and proactively counter evolving cyber threats, ensuring the privacy and trust of our valued stakeholders.

Mission and objectives

Our mission

EBA CLEARING's mission is to deliver market infrastructure solutions for the pan-European payments industry, to support its users' needs in line with user requirements. The strategic aims of the Company are to ensure a pan-European and country-neutral approach for the development and delivery of infrastructure solutions, thereby ensuring excellence and robustness in delivering our services. EBA CLEARING will maintain its track record of timely delivery of user-driven solutions responding to evolving and new demands for infrastructure solutions, thereby demonstrating its openness to stakeholders' needs and agility in its role as market infrastructure solutions provider.

Our objectives

EBA CLEARING aims to allow cost optimisation for its users, and is not seeking profit or shareholder value maximisation. In pursuing its mission, EBA CLEARING is guided by the objective to offer its users solutions that are fit for purpose and efficient, with a special focus on safety and ensuring compliance with regulatory and oversight requirements. EBA CLEARING recognises its role in supporting financial stability and promoting fair and efficient markets; it is committed to discharging these responsibilities.

A
gility

EBA CLEARING maintains a robust corporate governance in line with the needs of its pan-European user community and the wider European payments ecosystem. In shaping and evolving its governance, the Company also takes into account considerations relating to its business and corporate culture as well as its environmental and social responsibility.

The pan-European DNA of EBA CLEARING is reflected in its country-neutral governance model. In line with its aim to deliver user-driven payment infrastructure solutions, the Company's governance approach is based on strong user say arrangements. As required by the Revised SIPS Regulation, EBA

CLEARING maintains a solid corporate governance framework, comprised of the Company by-laws and a set of corporate documents, processes and policies.

These documents, processes and policies set out the governance arrangements within EBA CLEARING. These arrangements have been determined to be effective in providing clear and direct lines of responsibility and accountability.

Further information on the corporate structure as well as on the Company's governance model and bodies can be found under [Corporate Governance](#) and under [Reference documents](#).

Workplace

EBA CLEARING promotes the professional and personal well-being of its employees by offering training programmes and personal and career development opportunities, psychological support programmes, team-building events and activities, information awareness sessions and more.

Our diverse workforce is a cornerstone of our strength. Fostering a workplace that embraces diversity and inclusion, and where everyone is treated with respect, is an integral part of EBA CLEARING's company culture.

Community support

We regularly invite our staff to participate in corporate volunteering activities, many of which are proposed by staff members.

These activities include (but are not limited to):

- partnerships with local associations supporting people in need
- food serving at a daycare centre for refugees and homeless people
- charitable donations of work clothes (with one collection amounting to nearly 80 kg) in support of local associations combatting employment discrimination

Policies

The Company maintains a number of policies applicable to all staff, management and Board Directors related to anticorruption, antibribery, a code of ethics and business conduct and a number of compliance policies, including competition law.

[Environmental approach](#)

EBA CLEARING measures and monitors its environmental footprint, based on a robust environmental, social and governance framework, which has been inspired by the ISO 14005 standard.

Staff engagement

Our staff members play a crucial role in our contribution to a more sustainable society. Leveraging ideas from and with the support of our staff, we have implemented more than 100 initiatives in this area.

Our efforts include (but are not limited to):

- the operation of an ESG Steering Group responsible for defining and monitoring objectives and related environmental metrics, such as measuring the carbon footprint of the Company

- actions related to waste reduction, recycling, water usage, energy efficiency, travel CO2 emissions and procurement
- the organisation of a sustainability awareness campaign enabling our staff members – through their participation in ecological challenges – to learn more about climate issues and how to implement sustainable practices on a day-to-day basis
- the support of a tree-planting project combining environmental and social aspects by fostering both biodiversity and the economic growth of local communities
- the organisation of climate change workshops for our staff members aimed at understanding the connection of climate issues and societal events and at encouraging collective action

Key features

Immediate finality of processed payments

Through the real-time adjustment of the participants' positions, EURO1 provides immediate finality for every processed payment. This means that at the time a payment is processed it is irrevocable and final, there is no unwind. EURO1 thereby offers an RTGS-equivalent system.

The real-time adjustment of each participant's multilateral position is achieved through the unique legal structure of EURO1: the Single Obligation Structure (SOS). In the SOS, each participant only has one single obligation/claim towards the system at any time on any given business day. In other words, instead of having to manage multiple bilateral accounting arrangements, participants have one multilateral position in the system. This position is adjusted automatically and instantly every time a payment is duly processed.

The SOS is governed by German law and is legally validated in every jurisdiction where participants, or offices used for participation, are located.

EURO1 is designated under the Settlement Finality Directive (SFD) and settles in central bank money in T2 RTGS.

Identification of EURO1 as a SIPS

The European Central Bank designated EURO1 as a Systemically Important Payment System (SIPS) under the ECB Regulation on oversight requirements for SIPS in August 2014. EURO1 accordingly is subject to, and complies with, the highest oversight requirements.

EBA CLEARING publishes a [Disclosure Report](#) detailing the compliance of EURO1 with the SIPS Regulation and the Principles for Financial Market Infrastructures.

Minimal counterparty exposure managed by participants

Liquidity in EURO1 is generated by the mutual giving and receiving of limits between the participants. The bilateral limits granted by a EURO1 Participant to each of the other participants in total provide the multilateral net receiving limit (credit cap) of the grantor participant. Similarly, the total of the bilateral limits received by a EURO1 Participant from all the other participants provide the multilateral net sending limit (debit cap) of the grantee participant.

With the system of bilateral limits and the Single Obligation Structure, counterparty exposure is managed directly by the EURO1 Participants:

- All participants contribute in equal shares to a liquidity pool (which constitutes the maximum possible exposure of any two participants) in the form of cash deposits held with the ECB.
- The bilateral limits do not restrict the bilateral payment flows between the individual participants. Participants can send payments to any of the other participants within the limit of the total amount of their debit cap.
- The overall risk a participant can bring to the system is limited to the amount of the maximum debit cap set at system level. In case of a change of the number of participants, the amount of the maximum debit cap may be revised - as recommended, following user consultation. Any revision of the amount of the maximum debit cap is notified in advance to the participants.
- The risk for a participant based on a single failure is capped at the amount of the limits granted to the failing participant.
- EURO1 Participants can adjust the discretionary element of their limits to the other participants up until 02:00 CET on the same day, allowing participants to quickly react to changing circumstances.
- Participants are granted, by each of the other participants, a mandatory limit, the sum of which is equal to its deposit in the EURO1 Liquidity Pool. Accordingly, the mandatory limit a participant has to allocate to each other participant in the service amounts to the individual participant's liquidity pool deposit divided by the number of participants, less one.

Operational robustness and resilience

EURO1 is at the forefront of the industry in terms of safety, security and resilience. The system benefits from the state-of-the-art resilience of Swift, the processing service provider for EURO1.

EBA CLEARING runs three separate operations centres for system monitoring in different countries with rotating shifts

Specific dedicated procedures with critical service providers, including in particular Swift and the ECB as provider of settlement services, are ready for activation in case of abnormal events.

All operational procedures, including the resilience arrangements of all EURO1 Participants, are reviewed at regular intervals. In co-operation with its critical service providers, including the ECB and Swift, EBA CLEARING is engaged in a continuous process geared at testing, revising and further enhancing its resilience arrangements and procedures.

Benefits

The EURO1 migration is part of an ongoing industry-wide shift towards ISO 20022, which will have far-reaching benefits for the payments industry. These include greater interoperability between various payment systems and improved data flows, which will increase the efficiency of transaction processing and fraud detection.

Participants will be able to offer services to their corporate clients that will benefit from better and faster information and reconciliation, greater transparency and more payer-to-payee information.

The migration of EURO1 to ISO 20022 has already delivered specific benefits to its participants:

Extended opening hours, with the possibility to expand further

Central payment and liquidity monitoring and steering capabilities across EBA CLEARING payment services (e.g. via liquidity dashboard)

Full alignment with TARGET, allowing continued possibility to switch payment flows between the two systems and enables EURO1 users to rely on the system as a non-similar back-up for T2 RTGS.

- t some of the milestones of large-value payment system EURO1.

- [Contact us](#)

Liquidity efficiency

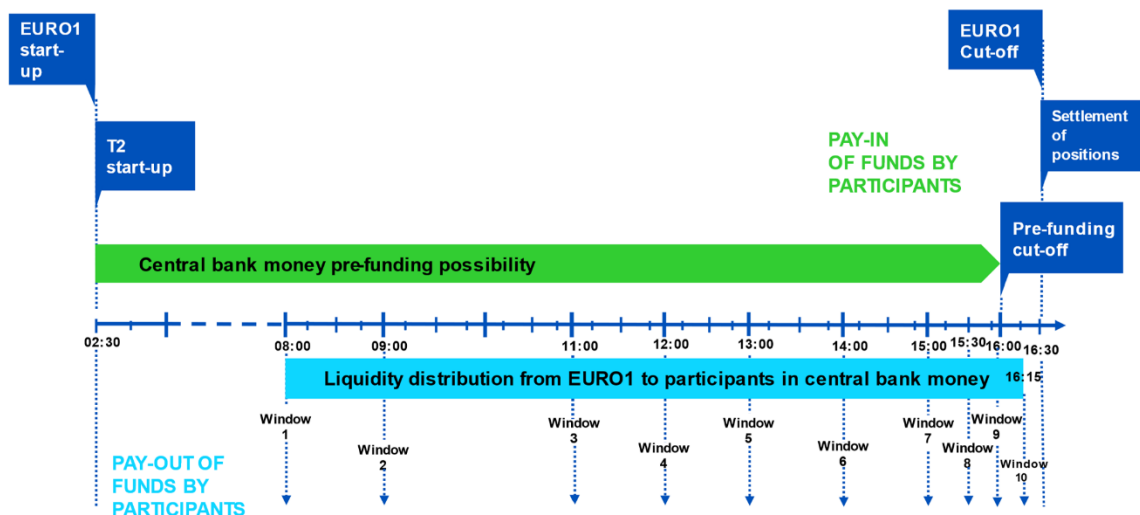

By operating on a net basis, EURO1 enables participants to significantly reduce the liquidity required to support their payments business; there is no requirement to pre-fund at the start of the day. The availability of a Debit Cap allows for participants to have immediate sending capacity and to send payments without having to wait for incoming funds. This considerably lowers the liquidity and capital support costs for participants.

In order to further recycle liquidity, EURO1 offers a Liquidity Bridge, which enables participants to proactively and independently manage their liquidity:

- Participants that have reached the maximum level of their Debit Cap can pay in funds from their T2 RTGS DCAs (pre-fund), against which their position in EURO1 is adjusted upwards. The participant has, as a result, acquired increased sending capacity against pre-funded liquidity.
- Participants that have incoming payments queued because they have reached the maximum level of their Credit Cap can authorise EBA CLEARING to withdraw liquidity from their credit position in EURO1 (liquidity distribution), which is then credited to the participants' T2 RTGS DCAs.
- Pre-funding takes place throughout the day and liquidity distributions take place at the ten most critical times to ensure the processing of the maximum number of queued payments.
- The liquidity distribution algorithm allows for the pre-funded liquidity to be recycled.

As a result of the liquidity management tools available, the EURO1 System is able to achieve a high Liquidity Efficiency Ratio (LER).

Participants can further exploit the liquidity-saving benefits of EURO1 by including branches as well as consolidated affiliates within the European Economic Area (EEA) under the single liquidity position of the participant.

(all times CET)

EURO1 Liquidity Bridge

EURO1 is geared at assisting participants in keeping cost down by enabling them to optimise their liquidity use. The system's Liquidity Bridge makes it possible for participants to withdraw excess liquidity from the system through seven daily liquidity distribution windows. The Liquidity Bridge also enables the participants to inject additional funds into EURO1 throughout the business day in order to allow for additional payments to be processed. This functionality supports the participants in resolving any queuing situations.

EURO1 Overnight Return

EBA CLEARING offers EURO1 Participants the possibility that the cash deposit representing the participant's share in the Liquidity Pool is only held with the ECB during the operating hours of

EURO1 and until successful end-of-day settlement, after which it is returned to the participant until the opening of the next T2 day. The function is provided for in the rules governing the system. Participants that wish to use the function must respect certain operational and technical requirements.

EURO1 pricing

The pricing policy for EURO1 consists of recovering all costs in relation to (1) the processing service provided by Swift, (2) the costs in relation to T2I settlement; and (3) the operational, administrative and depreciation costs of EBA CLEARING, as business administrator of EURO1, in relation to the service management and development of the EURO1 System.

The pricing objectives of EURO1 include in particular the objective to minimise costs of the users in relation to the processing of single payments.

Overview of fees

The Fee Schedule for EURO1 is available to all participants on the customer portal and is made available to prospective participants upon qualified request.

1) Entrance fee

A one-off fee of EUR 30,000 is payable upon connection to the system, and participant joining fees can apply.

2) Annual fixed fees

Fixed fees are in part shared equally among the EURO1 Participants.

3) Quarterly fixed transaction fees

Each quarter, participants shall pay a fixed transaction fee. The amount of such quarterly fixed transaction fee shall apply for the transaction volume sent during a quarter, regardless of and without a limitation on the actual transaction volume.

The quarterly fixed transaction fee shall be calculated as follows: the per-volume tier transaction fees set forth in the table below shall be applied on an incremental basis to the sum of (i) the number of

transactions during the last quarter of the second preceding calendar year and (ii) the number of transactions during the three quarters of the preceding calendar year; this annual total shall be divided in four quarters.

See table below for details:

Daily average volume tier – Based on the daily average number of payments.

from 1 to 800	0.32
from 801 to 1,750	0.23
from 1,751 to 4,000	0.16
from 4,001 to 7,000	0.08
from 7,001	0.04

4) Other fees

Pricing for the use of the SWIFT network for sending payment messages is a matter of the bilateral contract of each user with the network provider.

In addition to the above-mentioned fees, each participant contributes in equal shares to a liquidity pool by maintaining a deposit denominated in EUR with the European Central Bank (ECB). The deposits maintained with the ECB bear interest at the ECB's deposit facility rate. The maintenance of a liquidity pool is mandatory for compliance with the requirements on coverage of liquidity (and credit) risk as per the oversight requirements for systemically important payment systems.

Charges apply for administration of banks' participation in the service.

Upon exiting the system, an exit fee is payable. The amount of the exit fee is calculated in accordance with a formula to cover a share of the fixed service fees that would otherwise be borne by a participant for a specific period after the exit date.

Admission criteria and default rules

In order to be eligible to participate in the EURO1 system, an entity has to fulfil certain legal, financial and operational criteria.

Legal criteria

An entity has to*:

be authorised to conduct banking business, or be authorised under relevant EEA laws as an electronic money institution (EMI) or payment institution (PI)

have its registered office in the EU, the EEA, or, for credit institutions also, in a member state of the OECD

participate in the EURO1 System from its registered address or a branch located in the EU

provide a capacity opinion

not be a member of the same group as an existing EURO1 Participant (for pre-fund participants the requirement is to be a member of the same corporate group as a EURO1 Participant)

provide, where applicable, a statement of compliance with the conditions set out by EEA laws** for PIs and EMIs requesting their participation in designated payment systems

In addition, the laws of all the jurisdictions from where a participating entity accesses the system must recognise the Single Obligation Structure, which forms the legal basis of the system.

*Access by non-bank PSPs - May 2025: Access by non-bank PSPs to the system will become possible from the moment EEA PIs and EMIs are able to access the TARGET system and relevant EEA laws*** have been transposed. Subject to amendments of the TARGET guideline and such transposition, the admission criteria relevant to the participation of EEA PIs and EMIs in EURO1 are thus now expected to be applicable from October 2025.

** Pursuant to Article 35a of Directive (EU) 2015/2366 (Payment Services Directive 2 or PSD2) as amended.

*** amendments to PSD2 and to the Directive 98/26/EC (Settlement Finality Directive or SFD), allowing PIs/EMIs participation in payment systems.

Financial criteria (applying upon admission)

An applicant has to:

have own funds of at least EUR 1.25 billion

have a short-term credit rating of at least P2 (Moody's) or A2 (S&P), or equivalent

Operational criteria

An applicant has to:

have access to an RTGS account in TARGET

have adequate technical and operational facilities, including back-up facilities, and staffing for the purposes of participation in the system and for the security of its IT infrastructure for connecting to the system

Change dates

Change dates for all EURO1 Services are set by the below conditions:

There is a maximum of one change date per month: the first Monday of the month following an entire weekend (Saturday & Sunday) falling within that same month.

The administrative deadline for submitting legal and administrative documents is one month prior to the given change date.

There are no change dates during the freeze period between the second week of December and the second week of January.

Default rules

EURO1 is designed to ensure completion of settlement in the case of a default by any number of participants, based on the Liquidity Pool and Loss Sharing arrangements.

Exclusion, suspension and withdrawal from the EURO1 System

A participant can be prevented definitively or temporarily by the System Operator from continuing to participate in the system if certain suspension or exclusion events occur.

It can also decide voluntarily to leave the system.

Defaults, including financial or operational defaults, are addressed in first instance through the activation of incident handling and, as applicable, crisis management arrangements.

The occurrence of a suspension or exclusion event and the consequences thereof for the suspended / excluded participant and for the other participants are determined solely in accordance with the rules governing the system. The system's rules are proprietary and confidential, and are available to all participants, to prospective participants that have applied to become a participant, and to relevant authorities including in particular the European Central Bank as the lead overseer of EURO1.

Temporary suspension

Failure to comply with the operational and legal criteria for participation and failure to pay or replenish when due settlement related obligations constitute suspension events.

Where relevant, an inquiry notice is sent to the participant to confirm the occurrence of a suspension event.

Participants must remedy the cause of a suspension event. An appeals procedure is in place in case the System Operator denies the termination of a suspension.

Exclusion

Events that may give rise to exclusion comprise in particular:

confirmed insolvency events

loss of banking or PI/EMI license

unremedied suspension

Consequences of suspension/exclusion

Subject to the specific provisions of the EURO1 System Documentation, in the event of suspension or exclusion, no payment messages will be processed in relation to a suspended or excluded participant as from the moment of its suspension or exclusion (and, in the case of suspension, as long as the suspension continues).

Withdrawal from the system

A participant in EURO1 may voluntarily withdraw from the system upon at least 30 days' notice.

Flexible reporting options

In order to accommodate different banking group policies with regard to intraday and end-of-day balance reporting, the system offers different reporting options:

- a decentralised approach where the total value of each sub-participant's payments is shown as one net amount to the participant while the sub-participant receives a detailed statement
- a centralised approach where the sub-participant's traffic is reported in detail on the participant's statement while the sub-participant receives a consolidated statement

In order to qualify as a sub-participant in EURO1 a bank has to be:

- a consolidated affiliate subsidiary of a participant in the EURO1 system as evidenced by the accounts of the participant, or
- a foreign branch of a participant in the EURO1 System established in an EU or EEA location
- Participants may also include branches

Sub-participation enables banks to directly send and receive payments to/from all participants and sub-participants in the EURO1 system, with reachability to the STEP1 Participants. Payments sent and received by a sub-participant are included in the position of the participant and covered by the liquidity of the participant.

Sub-participants benefit from the same service features (cut-off times, message formats, etc.) as the participant.

In case of a merger or acquisition, sub-participation allows banking groups to quickly and easily include entities under one liquidity position. The participation mode thereby enables banks to centralise their liquidity management and directly connect their branches and subsidiaries to a pan-European single payment system. It further allows EURO1 Participants to leverage their liquidity in the system.

1. What does EBA CLEARING primarily provide to the European financial sector?
2. Which currency is EBA CLEARING's infrastructure focused on?
3. What is the name of EBA CLEARING's high-value payment service?
4. Which system processes SEPA payments such as SCT and SDD?
5. What does RT1 enable for participating banks and payment providers?
6. What year's Annual Report is highlighted on the homepage as of mid-2025?
7. What is FPAD, and what is its main purpose?
8. What service is built on FPAD to help prevent authorised push payment fraud?
9. Which solution offered by EBA CLEARING supports "Request to Pay" (R2P)?
10. How many transactions did EBA CLEARING services process in 2024?
11. What new daily transaction record was set by STEP2 SCT on 2 April 2024?
12. What was the new record for RT1 daily transactions on 31 March 2025?
13. Which committee or body oversees governance within EBA CLEARING?
14. Name one of the user support services mentioned on the website.
15. Which two social media platforms are linked from the site's footer?

16. What cookie consent solution does the website use?
17. When were the latest Board elections reported on the homepage?
18. Who was elected Deputy Chairperson of the Board in May 2025?
19. In how many countries is FPAD's VOP solution being used, according to May 2025 news?
20. Where on the site can you typically find documents such as reference papers and annual reports?

Perfect — here's the **Q&A set (20 questions with answers)** for the EBA CLEARING website:

EBA CLEARING Website — Q&A

1. **Q:** What does EBA CLEARING primarily provide to the European financial sector?
A: Payment infrastructure and services for euro payments.
2. **Q:** Which currency is EBA CLEARING's infrastructure focused on?
A: The euro.
3. **Q:** What is the name of EBA CLEARING's high-value payment service?
A: **EURO1**.
4. **Q:** Which system processes SEPA payments such as SCT and SDD?
A: **STEP2**.
5. **Q:** What does RT1 enable for participating banks and payment providers?
A: **Instant payments** (SCT Inst and OCT Inst).
6. **Q:** What year's Annual Report is highlighted on the homepage as of mid-2025?
A: **Annual Report 2024**.
7. **Q:** What is FPAD, and what is its main purpose?
A: **Fraud Pattern and Anomaly Detection**, designed to detect and prevent fraud.
8. **Q:** What service is built on FPAD to help prevent authorised push payment fraud?
A: **Verification of Payee (VOP)**.
9. **Q:** Which solution offered by EBA CLEARING supports "Request to Pay" (R2P)?
A: The **R2P** service.
10. **Q:** How many transactions did EBA CLEARING services process in 2024?
A: **23 billion transactions**.

11. **Q:** What new daily transaction record was set by STEP2 SCT on 2 April 2024?
A: **66 million transactions in one day.**
12. **Q:** What was the new record for RT1 daily transactions on 31 March 2025?
A: **6 million transactions.**
13. **Q:** Which committee or body oversees governance within EBA CLEARING?
A: The **Board of Directors** and its **committees**.
14. **Q:** Name one of the user support services mentioned on the website.
A: **Helpdesk, country representatives, billing & payment info, or system time schedule.**
15. **Q:** Which two social media platforms are linked from the site's footer?
A: **LinkedIn** and **YouTube**.
16. **Q:** What cookie consent solution does the website use?
A: **GDPR Cookie Compliance (WordPress plugin).**
17. **Q:** When were the latest Board elections reported on the homepage?
A: **27 May 2025.**
18. **Q:** Who was elected Deputy Chairperson of the Board in May 2025?
A: **Niklas Lemberg.**
19. **Q:** In how many countries is FPAD's VOP solution being used, according to May 2025 news?
A: **14 countries.**
20. **Q:** Where on the site can you typically find documents such as reference papers and annual reports?
A: Under the **About Us** section (e.g., "Reference Documents" and "Annual Reports").

More Details about the EBA CLEARING Website & Organisation

Organisation & Background

- EBA CLEARING was founded in **1998**. [EBA Clearing+3EBA Clearing+3EBA Clearing+3](#)
- It is owned by **48 of the major banks** operating in Europe. [EBA Clearing+1](#)
- Its services are "country-neutral" in governance, meaning decisions are made with a multinational user community in view. [EBA Clearing](#)
- The company has been certified under **ISO 27001** for information security. [EBA Clearing](#)

History & Evolution

- Started with **EURO1** (a large-value payment system) soon after its formation. [EBA Clearing+2EBA Clearing+2](#)
- Took over STEP2 in 2003, which handles mass payments & SEPA (credit transfers, direct debits) across Europe. [EBA Clearing+2EBA Clearing+2](#)
- In 2017, EBA CLEARING launched **RT1**, an instant-payments infrastructure (real-time with end-to-end euro payments) functioning 24/7. [EBA Clearing+1](#)

Website Structure & Content

The website is well structured; main sections include:

1. About Us

- At a glance: The Company; Mission and Objectives; ESG; Reference Documents; History of EBA CLEARING. [EBA Clearing+1](#)
- Corporate Governance: Shareholders; The Board; Committees; Management; Governance feedback (“User Say Governance”). [EBA Clearing](#)
- Regulatory: Comments on consultative reports. [EBA Clearing](#)
- Contact Us and feedback. [EBA Clearing](#)

2. Services

These are grouped by type:

- Single Payments (EURO1) [EBA Clearing+1](#)
- SEPA Payments: STEP2-T, STEP2 SCT, STEP2 SDD (Core & B2B) [EBA Clearing](#)
- Instant Payments: RT1, including SCT Inst & OCT Inst [EBA Clearing](#)
- Fraud fighting: FPAD, VOP [EBA Clearing](#)
- Other services: STEP2 CC, SEDA, R2P (Request to Pay) etc. [EBA Clearing](#)

3. News & Events / Media

- Latest news updates (e.g. on governance, reports, usage, adoption) [EBA Clearing](#)
- A section “In the Spotlight” featuring specific services or focal topics (e.g., Verification of Payee, ESG, RT1 OCT Inst etc.) [EBA Clearing](#)
- Videos, press releases, explainer series. [EBA Clearing](#)

4. Customer Support / My EBA CLEARING

- Customer support helpdesk, country representatives, billing & payments info. [EBA Clearing](#)
- “My EBA Clearing” – a portal for users and shareholders, to access documentation, manage contact data etc. Access is restricted. [EBA Clearing](#)

5. Legal / Policy Information

- Legal & Disclaimer page: specifies hosting info, data controller, privacy notice, data collection, cookies etc. [EBA Clearing](#)
- Cookie consent / GDPR compliance. [EBA Clearing+1](#)

Key Website Features & Metrics

- The site publishes **transaction volume statistics**: e.g. “23 billion transactions in EBA CLEARING payment services in 2024”; record days for certain services. [EBA Clearing](#)
- Highlights service adoption: e.g., “over 55 RT1 and STEP2 participants across 14 countries have adopted FPAD VOP” as of May 2025. [EBA Clearing](#)

- It shows that services are available broadly (SEPA reachability over ~ 4,800 financial institutions). [EBA Clearing](#)

Legal & Data Privacy

- Hosting: Microsoft Ireland Operations Limited. [EBA Clearing](#)
- EBA CLEARING S.A.S is registered in Paris, with capital authorized and LEI number etc. [EBA Clearing+1](#)
- Contact info: phone, email, editor/publishing director named. [EBA Clearing](#)
- Personal data: the site collects names, contact data, IP addresses, usage data, cookies etc. [EBA Clearing](#)
- Purposes of data processing are defined: website improvement, event management, service promotion, legal obligations. [EBA Clearing](#)

Competitive & Regulatory Context

- EBA CLEARING systems (especially EURO1 and STEP2-T) have been identified as *Systemically Important Payment Systems* by the **European Central Bank**. [Wikipedia+1](#)
- EBA CLEARING is a major European payments infrastructure player, complementary to systems like TARGET2, etc. [Wikipedia](#)
